# What a Taxonomy Illustrated is?

- The Taxonomy Illustrated is a guide that translates the **hard** XBRL Taxonomy machine code into a clear, visual layout (*human oriented*).
  - It organizes thousands of accounting terms into visual hierarchies (e.g., breaking down "Property, Plant, and Equipment" into "Land," "Buildings," etc.) so accountants and auditors can easily find the exact digital tags they need to use without needing to be IT programmers.
  - The term "Taxonomy Illustrated" was originally coined by IFRS. See [ifrs.org/issued-standards/ifrs-taxonomy/ifrs-taxonomy-illustrated/](https://www.ifrs.org/issued-standards/ifrs-taxonomy/ifrs-taxonomy-illustrated/)
