Arelle Overview

Arelle is the world's only open source XBRL platform. It is used by a global community of over 50 regulators, banks and technology companies that depend on it for data quality and comparison.

Opportunities For Improvement

- **Significant use of the FRC's UK iXBRL Viewer and user testing made it clear that there were opportunities to improve the Arelle viewer.**
- **In late 2025 the Arelle team began enhancing the viewer to improve usability and functionality.**
- **Significant improvements included:**
 - **Improved loading times for large fact count filings**
 - **Main menu and navigation enhancements**
 - **Search improvements**
 - **More consistent filtering experience**
 - **New search filters for negative and positive fact values**
